

Information for Solar Santa Monica's Energy Efficiency Services

Statement of Project

The City of Santa Monica has an ambitious goal to become a net-zero, energy independent city by 2020. Launched in 2006, Solar Santa Monica is a program designed to help residents, businesses and property owners reduce energy consumption and generate clean, renewable energy onsite. To make the City's 2020 goal a reality, Solar Santa Monica works side-by-side with contractors specializing in energy efficiency and renewable energy, and assists and educates the public.

The Contractors Network was established by Solar Santa Monica to further smart energy management. The Contractors Network is comprised of two lists: **1) Preferred Solar Contractors** – solar photovoltaic and solar thermal installers – and **2) Energy Efficiency Services** – a list for all other home improvement jobs that require a contractor, and does not including solar installers.

It is Solar Santa Monica's hope that your company will join our Contractors Network as a member of one or both of these lists. Membership is free, without a deadline, and requirements are basic. Businesses and residents will be encouraged to seek competitive bids from each list.

Energy Efficiency Services Submittal Checklist

Application Form

Thank you for taking the time to complete all the documents. Please review for accuracy and then submit to Susan Munves. Solar Santa Monica hopes to see you soon!
